

In-service training course

Powder Formulation:

Design principles, Characterisation and Processes

October 21 - 23, 2020

Online course

Now as
online course

Outcome

Through presentations, exercises and plenum discussions participants will acquire solid knowledge of powder formulation - i.e. what are the challenges and possibilities and what you as formulator should be aware of regarding powder characterisation and process decisions.

Main subjects taught in the course

(see also last pages of flyer for the detailed program)

- Particle technology basics relevant for powder properties
- Powder characterisation & powder sampling
- Design principles for powder handling
- Powder product formulation guidance and case stories
- Powder product stability and shelf life evaluation
- Powder processes and the influence of formulation:
- Spray and freeze drying
- Fluid bed drying, coating and agglomeration
- Powder blending and segregation issues

Target group

The course addresses technicians as well as formulators and process engineers working in the chemical, pharmaceutical, biotech and/or food industry with manufacture or development of powder products.

Form

The online course runs for three consecutive days with alternating presentations, exercises and plenum discussions. All course material is sent in advance of the course.

The course is held online via an online conference tool in real-time allowing questions and discussions to be facilitated in real-time.

There will be sufficient amount of breaks and time to ask questions in between the different sessions.

The course is held in English.

Registration and further information: Please see the next pages

Powder Formulation:

Design principles, Characterisation and Processes

Online course

October 21 - 23, 2020

Teachers

Søren Vinter Søggaard, M.Sc. (Pharm.), Ph.D.

- Pharmaceutical Formulation Scientist
- Speciality in flow-ability, segregation and compaction properties
- Teaching experience from School of Pharmaceutical Sciences, University of Copenhagen

Peter Dybdahl Hede, M.Sc. (Chem. Eng.), Ph.D.

- Director Pharmaceutical R&D, previously Head of R&D in the biotech and health & nutrition industry
- Teaching experience from The Danish Society of Engineers, Technical University of Denmark and numerous service training courses in particle technology
- Co-founder of seydlitz.dk. Provides in-house seminars and consultancy in powder technology

(Guest speakers)

HOSOKAWA
MICRON B.V.

nne[®]
Focused pharma engineering

Fee

The course fee is payable in advance either via direct deposit (details included in the invoice) or via credit card payment available upon online registration at our homepage.

The course fee includes all course presentations, calculation exercises and solutions, selected scientific papers as well as course diploma (all in PDF format).

All course material is available for download well in advance of the course.

Per delegate EUR 1875,- plus VAT. VAT is reclaimable.

Registration

Binding registration at www.seydlitz.dk under "Courses" no later than 15th of September 2020. In case of any questions please contact Info@seydlitz.dk or phone **+45 29 49 30 40**.

The course may be subject to cancellation in case of too few participants

Powder Formulation:

Design principles, Characterisation and Processes

Online course
October 21 - 23, 2020

Course contents

**CEST time
zone**

Day 1: Subject

10.00 - 10.15	Course introduction
10.15 - 11.00	Particle size and particle shape, Particle size measurement - principles and equipment
12.00 - 13.00	Lunch
13.00 - 13.30	Influence of particle size and shape on different powder product properties
13.30 - 14.45	Characterisation of powder flow properties
14.45 - 16.00	Design of equipment for powder handling

Day 2: Subject

9.00 – 10.30 Introduction to powder formulation, stability and powder product shelf life
How can different industries learn from each other?

10.30 – 12.00 Powders and tableting, Process Analytical Technology - presented by

nne[®]

Focused pharma engineering

12.00 – 13.00 Lunch

13.00 – 14.00 Moisture in air - introduction to drying processes

14.00 – 16.00 Drying processes and drying process equipment - presented by

**HOSOKAWA
MICRON B.V.**

Powder Formulation:

Design principles, Characterisation and Processes

Online course
October 21 - 23, 2020

Course contents - continued

Day 3:	Subject
9.00 - 11.00	Formulation and process development of tablets for the pharmaceutical industry
11.00 - 12.00	Powder sampling - theory and practice, Particle blending and segregation issues,
12.00 - 13.00	Lunch
13.00 - 13.30	Equipment and processes for powder blending
13.30 - 14.30	Introduction to granulation processes; coating and agglomeration - influence on product properties
14.30 - 15.00	Discussion: Common problems in powder formulation development: When things are not as they should be...
	How can we help each other? Discussion in plenum of case examples and specific formulation problems raised by the course participants.
15.00 - 16.00	Plenum case: How can we rethink an existing powder platform?
	Group case : Instability of food product component: How to overcome a challenging stability issue
16.00	Final remarks, Course evaluation
